BY CrossTime Index of Questionnaire Items

The crosstime index is a listing of MTF variables from 1976 forward. The crosstime index is organized first by **Subject Area**. Within each Subject Area, questions are listed in numerical sequence by **Item Reference Number (IRN)**, which is the unique identifier assigned to each question in the MTF study.

Using the Subject Area Key, below, locate the code for an area of interest and then search the crosstime index for this code. For example, "A01a" is the Subject Area code for "Number of uses in lifetime" under the major heading of A01 "Use of Various Licit and Illicit Drugs". Using the Subject Area Key can help focus your search to variables of interest. [Please note: the same Subject Area Key is used for all MTF cohorts. Entries will be missing if the key code is not relevant to the specific cohort.]

Subject Area Key

A. Drugs. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meaning of drug use. Views of significant others regarding drugs

A01. Use of Various Licit and Illicit Drugs
- A01a. Number of uses in lifetime

Using the Crosstime Index

Once you have located a **Subject Area** of interest using the Subject Area Key, the Crosstime Index can be used to find specific variables. All variables that are related to a particular subject area are grouped under each subject area heading. For example, EVER DRINK is the **Question Name** (abbreviated) of a variable and is located under A01 "Use of Various Licit and Illicit Drugs" and then A01a. Drugs. Number of uses in lifetime (see figure on next page).

Using the Crosstime Index, you will find important variable information such as IRN, the form(s) the variable is located on, the first and last year the variable was asked in the MTF study, and a listing of years for any changes to the question.

Definition of Column Headings

The definition of headings in each column are given below under the number indicated in the following key.

1. **Subject Area.** This indicates the subject content areas.
2. **IRN.** Abbreviation for **I**tem **R**eference **N**umber. This is a unique identifier given to a question across all grades, ages, forms, and years of the MTF study. The IRN can be used to search all documentation for information about a particular survey item.
3. **Question Name.** This is a brief description that characterizes the content of each question. The question name is also part of the variable label in the data files.
4. **Form.** The numeric value to indicate on which form(s) the question is located. For BY, forms 1-6.
5. **FirstYr, LastYr.** These columns provide information about the first and latest year the IRN was included in the MTF study. NOTES: The *Crosstime Index* is created from MTF's internal database of survey questions. Many questions will have a LastYr date indicating MTF's most recent data collection year, and this date will likely differ from the data currently available through NAHDAP. Also, some questions will indicate a FirstYr of 1975. Please be aware that the data available for use begins with base year 1976.
6. **Changes.** The year(s) listed in this column indicate if and when there was a change to the question stem, question text, or response options since the questions' initial introduction to the MTF study. If multiple changes occurred in the same year, the year will be listed twice.
7. **Questionnaire Location by Year.** A survey location is provided for each year in which an item appeared in one of the MTF study's survey forms. Each entry under a given year indicates the form in which the question appears, the part of that form, and the question number. For example, for the entry 00790 EVER DRINK, the questionnaire location 2B03 indicates the question appeared in Form 2, Part B, and was labeled as question 03.
